

## DAIRY REFORMS.

Fractional Suggestions to Milk Venders Contained in Paper

READ AT FARMERS' INSTITUTE.

By Dairyman S. F. Simpson—Better Treatment for the Cows and Systematic Principles Urged Before the Recent Meeting of Ohio County Farmers—The Time for Haphazard Methods is Past.

One of the most interesting and instructive papers read at the recent meeting of the Ohio county farmers' institute, at Elm Grove, was that on "Reforms in the Dairy," delivered by S. F. Simpson, of this city, himself an experienced dairyman. His paper, which is given in full below, contains many pertinent and profitable suggestions. Mr. Simpson said:

The time when haphazard, hit and miss dairymen can be conducted on a paying basis has gone by—the dairyman of to-day, if he would reap an adequate reward for his labor must keep abreast of the times. The cow is no longer regarded as an animal who can swallow a certain amount of food without regard to its quality or its constituents and give back a certain quantity of milk which can be handled by any novice and served in any and every conceivable manner by the veriest tyro in the milk business. The pioneers of advanced dairymen have at last awakened the masses to the fact that the cow is a delicately organized and highly sensitive piece of animal mechanism. She is ready and willing to return her owner the full value of her food at all times. She responds readily to kind and humane treatment, but quickly resents ill usage.

Give the properly bred "Bossy" the proper food in the proper manner, house her in the style her vocation demands and she is a valuable animal. But she demands the same advanced treatment that man himself demands. The time was when the farmer's house wherein he lived and reared his family was a much more open and exposed structure than to-day is accorded to many herds of cows. The log cabin with clapboard roof and stick chimney, has gone and in its stead stands the comfortable farm house. The dairy farmer of to-day is not the rough uncultured man of fifty years ago. He is daily learning how we can best assist nature in the war of the plants and how to gather from his farm those values which he most needs for the economic production of milk. He is constantly seeking ways by which he can assist his herd in the winter months to the equivalent of the succulent food that it gathers in the June pasture fields. He has learned that the porteur, the carbohydrates and the ether must hold certain ratios toward the dry matter that the cow takes into her stomach in order to produce the best results. The day when the dairy farmer feeds his cow on dry corn stalks, timothy hay and cornmeal and then condemns the cow for not returning a fine pail of milk is gone forever, and the intelligent herdsman is made glad by having free access to a well-balanced daily ration for the animals in his charge.

But there are yet other things to be considered in connection with dairymen than the feeding of the cow. There is her house; it must be warm and comfortable. A cow standing where the cold winter wind strikes her through a crack in her house wall, will require at least one pound more hay each day to keep her warm. That means two hundred pounds for the season; at \$10 a ton the hay would be worth \$1, of a ton she will need just as much, making \$2 per cow. Now if you have thirty cows there is a loss of \$60—the price of one very good cow each year. Institute the reform movement by boarding up these expensive cracks.

There are four things a successful dairyman must have, proper food, a good man, a lead pencil and a shotgun. His cows must have food suited to making milk. He must have a reliable, sober, honest, kind, careful man to feed and care for his cows. He must have a lead pencil to note down the amount of food each individual cow is getting and how much milk she is returning. If the good man with proper food cannot make the lead pencil figure the balance on the right side of

## Oh, the Pain of Rheumatism!

Rheumatism often causes the most intense suffering. Many have for years vainly sought relief from this disabling disease, and are to-day worse off than ever. Rheumatism is a blood disease, and Swift's Specific is the only cure, because it is the only remedy which can reach such deep-seated diseases.

A few years ago I was taken with inflammatory Rheumatism, which became so intense that I was for weeks unable to walk. I tried several prominent physicians and took their treatment faithfully, but was unable to get the slightest relief. In fact, my condition seemed to grow worse. The disease spread over my entire body, and from November to March I suffered agony. I tried many pain medicines, but none relieved me. Upon the advice of a friend I decided to try S. S. S. Before attempting to take it, however, my guardian, who was a chemist, analyzed the remedy, and pronounced it free from poison, and I felt so much better after taking two bottles that I continued the remedy, and in two months I was cured completely. The cure was permanent, for I have never since had a touch of Rheumatism though many times exposed to damp and cold weather.

Don't suffer longer with Rheumatism. Throw aside your oils and liniments, as they can not reach your trouble. Don't experiment with doctors—their poisons and mercury will add to your disability and completely destroy your digestion.

## S.S.S. For the Blood

It will cure perfectly and permanently. It is guaranteed purely vegetable, and contains no poison, mercury or other mineral. Books mailed free by Swift Specific Co., Atlanta, Ga.

## CURES WEAK MEN FREE.

Send Name and Address To-day---You Can Have It Free and Be Strong and Vigorous for Life.

INSURES LOVE AND A HAPPY HOME.

L. W. KNAPP, M. D.

How any man may quickly cure himself after years of suffering from sexual weakness, lost vitality, night losses, varicocele, etc., and enlarge small weak organs to full size and vigor. Simply send your name and address to Dr. L. W. Knapp, 241 Hull Bldg., Detroit, Mich., and he will gladly send the free receipt with full directions so that any man may easily cure himself at home. This is certainly a most generous offer, and the following extracts taken from his daily mail show what men think of his generosity.

"Dear Sir:—Please accept my sincere thanks for yours of recent date. I have given your treatment a thorough test and the benefit has been extraordinary. It has completely braced me up. I am just as vigorous as when a boy and you cannot realize how happy I am."

"Dear Sir:—Your method worked beautifully. Results were exactly what I needed. Strength and vigor have completely returned and enlargement is entirely satisfactory."

"Dear Sir:—Yours was received and I had no trouble in making use of the receipt as directed, and can truthfully say it is a boon to weak men. I am greatly improved in size, strength and vigor."

"All correspondence is strictly confidential. The mail, mailed in plain sealed envelope. The trial, mailed in plain sealed envelope. He wants every man to have it."

same courteous treatment from your customers that the cashier, the merchant, and the professional man do? If your commodity is pure and honest and your price just and service that which a gentleman would render, stand up before your customers, and by your just and gentlemanly actions put upon them the shame of saying or thinking that a milk man cannot be cleanly.

The fault lies not in your profession, but in your way of following it. The scientific, systematic dairy worker has advanced to that plane where jibes and jeers at his vocation are misplaced. By the forceful application of brain power he has placed his business among the leading ones of the land. The wealth invested in this country in dairymen amounts to many millions and the number of families supported by wages paid by dairy owners attest the magnitude of our work. Let us then unite in bringing about a reform on the part of our friends the consumer, so that the milkman may no longer be the butt of the kitchen maid's jokes, nor the object of the mistress' suspicion.

There is no food so quick to draw to itself foreign odors as milk, so I say get it from the barn as soon as possible after you have drawn it from the cow. Do not wait until the entire herd has been milked, but get each cow's milk out into the pure, open air as soon as milked.

The act of milking often offers a peg upon which to hang another reform. I say often, but I may be wrong—I hope I am, for if there is one habit that is reprehensible and wholly to be condemned in the whole line of dairy work it is the habit I now refer to. It is this one of milking with wet hands. It matters not how clean a milkman's hands may be when he begins to milk, before he has finished one cow his hands will be more or less contaminated by contact with the hair and skin of the cow's udder and any foreign substance that by any possible chance may have been hanging to the cow. If he wets his hands, as some do, by drawing the first short stream of milk into the palm of his hand, he has increased the chances a thousand fold for washing into the milk these elements of filth, to be carried to the consumer of his dairy products. But if the dairyman is in the advance class up to this point, has well bred stock, well housed in a light, warm, ventilated barn, cared for by a good man and milked by clean milkers and yet fails to thoroughly aerate his milk, he is no longer a good dairyman, and must set up still another peg and mark it "reform." Nothing so adds to the keeping of the healthful quality of milk; if I except alone that of clarification and pasteurizing, as the act of aeration.

But after aeration comes the bottling of the milk and here one can render of no avail all his efforts at good dairymen if he is lax in thoroughly cleansing his bottles and cans. Nothing but the utmost diligence and a practical application of soda, brush, steam, hot water and pure air will serve to keep the milk bottles in a presentable form. And now I come to the last reform. I care to mention. The good dairyman has seen that the condition of his stock cannot be improved. They are fed intelligently, cared for kindly and their product prepared for the market in a clean, faultless manner. The well groomed cow, with her glossy, sleek coat, attests the fact that she has been fed, watered, carded and brushed and bedded by a kind, thoughtful herdsman.

The pure, sweet milk stands encased in clear, clean bottles ready to be served, and I would ask, Mr. Dairyman, are you honest? Are you cleanly in person? Is your measure true and full? Have you a just conception of the right of others? Is your calling an honest one? Is the work of dairymen legitimate? Does it call for an exercise of brain work, or is it of that lower order wherein only brawn and muscle are required? Is your business as respectable as that of the dry goods merchant or the shoe dealer, or the furniture or grocery man? I know well what your answer will be. Each one of you who to-day sells milk, be it the product of five or a hundred cows, is saying my business and my profession are as respectable and as legitimate as is that of any other man. Then, sir, why do you not in every case exact the

same courteous treatment from your customers that the cashier, the merchant, and the professional man do? If your commodity is pure and honest and your price just and service that which a gentleman would render, stand up before your customers, and by your just and gentlemanly actions put upon them the shame of saying or thinking that a milk man cannot be cleanly.

The fault lies not in your profession, but in your way of following it. The scientific, systematic dairy worker has advanced to that plane where jibes and jeers at his vocation are misplaced. By the forceful application of brain power he has placed his business among the leading ones of the land. The wealth invested in this country in dairymen amounts to many millions and the number of families supported by wages paid by dairy owners attest the magnitude of our work. Let us then unite in bringing about a reform on the part of our friends the consumer, so that the milkman may no longer be the butt of the kitchen maid's jokes, nor the object of the mistress' suspicion.

## DISASTROUS FIRE

In the Retail Dry Goods District of Philadelphia.

PHILADELPHIA, March 7.—A fire, entailing an estimated loss of over \$700,000, occurred early to-day in the retail dry goods districts. The conflagration originated in the engine room of Shoneman Brothers' dry goods and millinery store at Eighth and Arch streets. The building was T-shaped, fronting on three streets, Eighth, Arch and Cherry. The engine room was in the basement of the center of the structure. It is said that while the fire was being drawn from the furnaces sparks communicated with some waste paper and the little blaze spread with astonishing rapidity to the upper floors.

This was at 7:15 o'clock and the employees had not yet arrived. A general alarm was sounded, but all efforts to save the building were fruitless and it was leveled. The loss is placed at \$300,000.

Marks Brothers' dry goods store, adjoining, was partly damaged by smoke and water, and their store house was completely gutted, entailing a loss of \$300,000. The Shoneman building was four stories and Mark's five stories in height.

The flames spread to the six-story building on Cherry street occupied by Myerhoff Brothers, manufacturers of women's and children's clothing, and the Philadelphia Electrical Equipment Company. Nothing was left of the place but the walls. The loss is placed at \$300,000.

Several smaller buildings were more or less seriously damaged. About 1,500 persons, men, women and children, are thrown out of employment by the fire.

## PAUNCEFOTE

To Remain in America Because of His Popularity.

LONDON, March 7.—The St. James Gazette this afternoon, while declaring that the extension of Lord Pauncefote's stay at Washington as ambassador of Great Britain is due to the coming presidential election and "all that goes with this recurring commotion," says:

"To Americans Lord Pauncefote's stay will be acceptable because he has achieved the feat of making himself popular with a success for which there is no precedent since the first British minister was accredited to the United States, a century and a quarter ago. To us his continued tenure of office is acceptable, because he has pleased the Americans; and it is highly desirable from a business point of view, as well as grateful to our feelings, that they should continue to be pleased."

Actors, Singers, Talkers—Are all more or less subject to Bad Throat, Hoarseness, Tonsillitis and Catarrh. Dr. Agnew's Catarrhal Powder never disappoints. "I can but proclaim Dr. Agnew's Catarrhal Powder a wonderful medicine for actors, singers and public speakers. Myself and my wife have tried everything, but have never found anything to equal this great remedy, for quick action; it certainly is a wonder worker."—Al. Emmett Postell, New York City. Sold by Charles R. Goette, Twelfth and Market streets—14.

## JAPANESE OFFICIALS

Will Not Admit that War With Russia is Imminent, but at the Same Time It is Admitted that Japan is the Only Obstacle to Russia's Eastern Plans.

NEW YORK, March 7.—A dispatch to the Herald from Yokohama says: No one of the legations in Tokio nor any of the Japanese officials will acknowledge that war with Russia is imminent. It is well known in diplomatic circles that at present Japan and Russia are working secretly to obtain concessions in Korea against other nations, but this does not mean that a clash between Russia and Japan is not coming in the future.

Japan is the only serious obstacle in the way of the Russian eastern policy. Japan must have Korea, which already is flooded with Japanese coolies who are really soldiers.

Russian transports pass through Nagasaki constantly loaded with troops for Port Arthur.

The Japanese common people have a great hatred for Russia and would welcome war without counting the cost, but they have little power.

Japan has not money for war, and Russia will yield to Japan so long as the trans-Siberian railroad is incomplete.

An American engineer who has been over the road reports that it cannot be used effectively for nine months.

Rumors of an impending war originated in Shanghai, not in Japan, and were based on generalizations, not on facts.

Russia is now changing her representatives throughout Japan, and would not do so if she expected an immediate outbreak.

As during the last three years, a crisis resulting in war might arise at any moment, but for the present it is not at hand, and in my opinion, Russia can prevent it until she is ready.

## GEN. BULLER CONGRATULATES

The Relieving Force and the Garrison of Ladysmith.

DURBAN, March 6.—General Buller, in a general order regarding the relief of Ladysmith, says:

"Two forces during the last few months have striven with conspicuous gallantry and splendid determination to maintain the honor of the queen and the country. The Ladysmith garrison for four months held that position against every attack with complete success and endured many privations with admirable fortitude. The relieving force had to force its way through an unknown country, across unfordable rivers and on almost inaccessible heights face a fully prepared, well-armed and tenacious enemy. By the exhibition of the truest courage, courage that burns steadily beside flashing brilliantly, accomplished its object and added a glorious page to the history of the country."

"Ladysmith was successfully held and relieved, and the sailors and soldiers, colonial and home born, who had done this, were united by one desire and inspired by one patriotism."

The order congratulates both forces on the martial qualities displayed and thanked them for their determined effort. General Buller also sympathizes with the relatives and friends of the gallant comrades who have fallen.

## RUMORS OF A COMPROMISE

Between Carnegie and Frick Are in Circulation.

NEW YORK, March 7.—Charles M. Schwab, president of the Carnegie Steel Company, left this city for Pittsburgh this evening. He came here to consult Andrew Carnegie about the litigation in which the Carnegie company and Mr. Carnegie are involved as a result of the suits brought by H. C. Frick and others. Mr. Schwab and Mr. Carnegie were in consultation the greater part of yesterday. Neither would talk about the conference. The time allowed for Mr. Carnegie and the Carnegie company to file an answer in the suits in question will soon expire, and it is believed the conference was in relation to the wording and general tone of this answer. While neither Mr. Carnegie nor Mr. Schwab would talk about the matter it was persistently rumored that the trouble between Mr. Frick and his associates and Mr. Carnegie and the Carnegie Steel Company would be compromised and the suits discontinued.

## RUSSIA AND JAPAN

May Soon be Struggling for Possession of Korea.

NEW YORK, March 7.—A dispatch to the Journal and Advertiser from Odessa says:

Among the officers of the volunteer fleet of cruisers who recently returned here from the far east there is a strong belief that the enormous garrisons being formed at Port Arthur, Dairen and Vladivostok would be utilized soon as a coercive lever for compelling the Japanese to abandon their pretensions and acquisitions in Korea.

The commander of one of the cruisers expresses his conviction that before the end of this year Russian influence in the far eastern peninsula will have become so absolutely dominant that the Japanese will feel morally constrained to give up the struggle and retire from the many important enterprises they are now prosecuting in Korea, and that will open the way for the gradual assumption of a Russian protectorate.

## Northern Ohio Floods.

CLEVELAND, O., March 7.—Telegrams from various points in northern Ohio to-day indicate that great damage is being done by floods.

At Fremont the Sandusky river has overflowed its banks and submerged the lower part of the town. Cellars of business houses are filled with water and many factories have been compelled to close down.

At Warren the Mahoning river has reached the danger point and the lower part of the town is flooded. Much damage has resulted at Massillon owing to the Tuscarawas river overflowing its banks.

The Grand river at Painesville is out of its banks and a serious flood is now feared.

The bridge of the Sandusky, Milan & Norwalk electric road at Milan has been washed away and much other damage done.

Rocky river is on a rampage at Berca, where 200 acres are submerged and the water is still rising.

The stone quarries of the Cleveland Stone Company and the village pumping station are covered with water, entailing heavy losses.

NO matter how long you have had the cough; if it hasn't already developed into consumption Dr. Wood's Norway Pine Syrup will cure it—3.

## CASTORIA.

The Kind You Have Always Bought Bears the Signature of J. C. Watson.

## Longevity

TRADE MARK

"In the fall of 1891 I had a severe attack of muscular rheumatism, which settled in my right arm and shoulder. I was able to do little or nothing but rest. I determined to give it a thorough trial. I took six or eight teaspoonful doses daily, diluted in water, with plenty of hot water and inside of two days was relieved so much so exact that the pain had almost entirely left me. By continuing the treatment a short time longer I was thoroughly cured and I am gratified to state that there has been no recurrence of the trouble. Since then I have frequently recommended Longevity to friends suffering from rheumatism, neuralgia, sciatica, etc. and I have yet to hear of a single instance where it failed to cure the disease."

W. F. MAYHEW, June 24, 1899. Missouri Pacific Ry. Co., Equitable Bldg., St. Louis.

## INFALLIBLY CURES

## Rheumatism

In its worst paroxysms it is relieved by a few doses of Longevity. Its complete cure invariably follows the prescribed treatment with Longevity. No opium or morphine or other dangerous drug is contained in Longevity. It is the safest as well as the best remedy known for Rheumatism, Gout, Neuralgia, Sciatica, Lumbago, Nerve and Joint Pains, Headache, Sprains, Rheumatoid, etc. and its cures. Write for a free copy of the book describing Longevity and its cures.

SELLER DRUG COMPANY, St. Louis, Mo.

## LEGAL NOTICES.

## SUMMONS.

The State of West Virginia: To the Sheriff of Ohio County, Greeting:

We command that you summon James J. Kirby, if he be found to your bailiwick, to appear at the clerk's office of the circuit court of Ohio county, at rules to be held for said court, on the first Monday in February, 1900, to answer a bill in chancery exhibited against him in the said court, by Allie Kirby, and have then and there this writ. Witness C. H. Henning, clerk of our said court, in the city of Wheeling, of said county, in the city of Wheeling, the 2nd day of February, 1900, and in the 3rd year of the state of West Virginia.

A copy—Attest: C. H. HENNING, Clerk.

SHERIFF'S RETURN. James J. Kirby is not an inhabitant of my bailiwick, nor found therein this 8th day of February, 1900. W. J. LYLE, D. S. C. For H. C. Richards, S. O. C.

## ORDER OF PUBLICATION.

The State of West Virginia, Ohio County, ss.

In the Circuit Court of Ohio County, West Virginia, February Rules, 1900.

Allie Kirby vs. James J. Kirby—in Chancery.

The object of this suit is to obtain a divorce from the bond of matrimony with said defendant, on the ground of more than three years abandonment of said plaintiff by said defendant.

And it appearing from an affidavit filed in said cause, at these Rules, by her attorney, James J. Kirby, a not a resident of the state of West Virginia, and he not having been served with process in said suit, on motion of the plaintiff, by her attorney, this order of publication is entered against him, and it is ordered that the said defendant, above named, be and he is required to appear with his one month after the date of the first publication of this order, and do what is necessary to protect his interests. It is further ordered that this order be published and posted as required by law.

Witness C. H. Henning, clerk of said court, at the court house of said county, this 7th day of February, 1900, to-wit: February Rules, 1900.

Published the first time February 5, 1900. C. H. HENNING, Clerk.

Attest: C. H. HENNING, Clerk.

W. J. W. COWDEN, Attorney for Plaintiff.

## NOTICE TO TAKE DEPOSITIONS.

Allie Kirby vs. James J. Kirby—in Chancery, in the Circuit Court for Ohio County, W. Va.

Take notice that the depositions of Mary A. Howard, Lillian Conley, Benjamin Willard and Allie Kirby will be taken at the law office of W. J. W. Cowden, No. 111 Chapline street, in the city of Wheeling, Ohio county, West Virginia, on Saturday, the 17th day of March, 1900, between the hours of 9 o'clock a. m. and 5 o'clock p. m., to be read in evidence in the above named cause on behalf of said plaintiff. And it from any cause the taking of said deposition shall not be commenced, or being commenced shall not be completed, on said day, the taking of the same shall be adjourned from time to time until the same shall be completed.

ALLIE KIRBY, Plaintiff.

By W. J. W. COWDEN, her Attorney.

To JAMES J. KIRBY, Defendant.

## NOW READY.

## Daughter of the Elm.

A Tale of the Virginia Border

Before the War.

By GRANVILLE DAVISON HALL.

A powerful story, recalling forgotten tragedies. A love story threads a stirring recital of crime and detective work. Scene in the valley of the upper Monongahela, connecting with Pittsburgh, Clarksburg and Fairmont.

The book is something more than an ordinary bit of fiction. It has a substratum of historical fact, and some real people figure in its pages. There is a vivid glimpse of American life as found in that valley forty years ago. The book critic of a great metropolitan western daily, who read the manuscript, says the author has "dipped his pen in the very pigments of life." The head of a leading Chicago publishing house said of it: "We have been much interested in 'the plot is clever' and details 'ingenious.' The story itself is interesting and there are some capital situations."

MAYER & MILLER, CHICAGO.

Cloth, 330 p., \$1.00. Sold by Frank Stanton, or sent postpaid on receipt of price. Address, A. C. Hall, Glencoe, Ill.
